

LYCAN

Accelerating the World's Transition to Sustainable Transportation through end-to-end EV Solutions.

a Lycan presentation
by John Gangat, Founder & CEO

LYCAN

The world is experiencing a global catastrophe that's killing us very slowly...

"90% of all carbon emissions is caused by fossil fuel pollution"

<https://www.earthday.org/4-contributors-to-climate-change/>

LYCAN

LYCAN

Building a cleaner future, one EV at a time.

Western Nautical Highway, Aklan

LYCAN

LYCAN

Vehicle-as-a-Solution: Purpose-Driven & Customer-Centric Electric Vehicles

Impacting lives with bespoke vehicle solutions

LYCAN

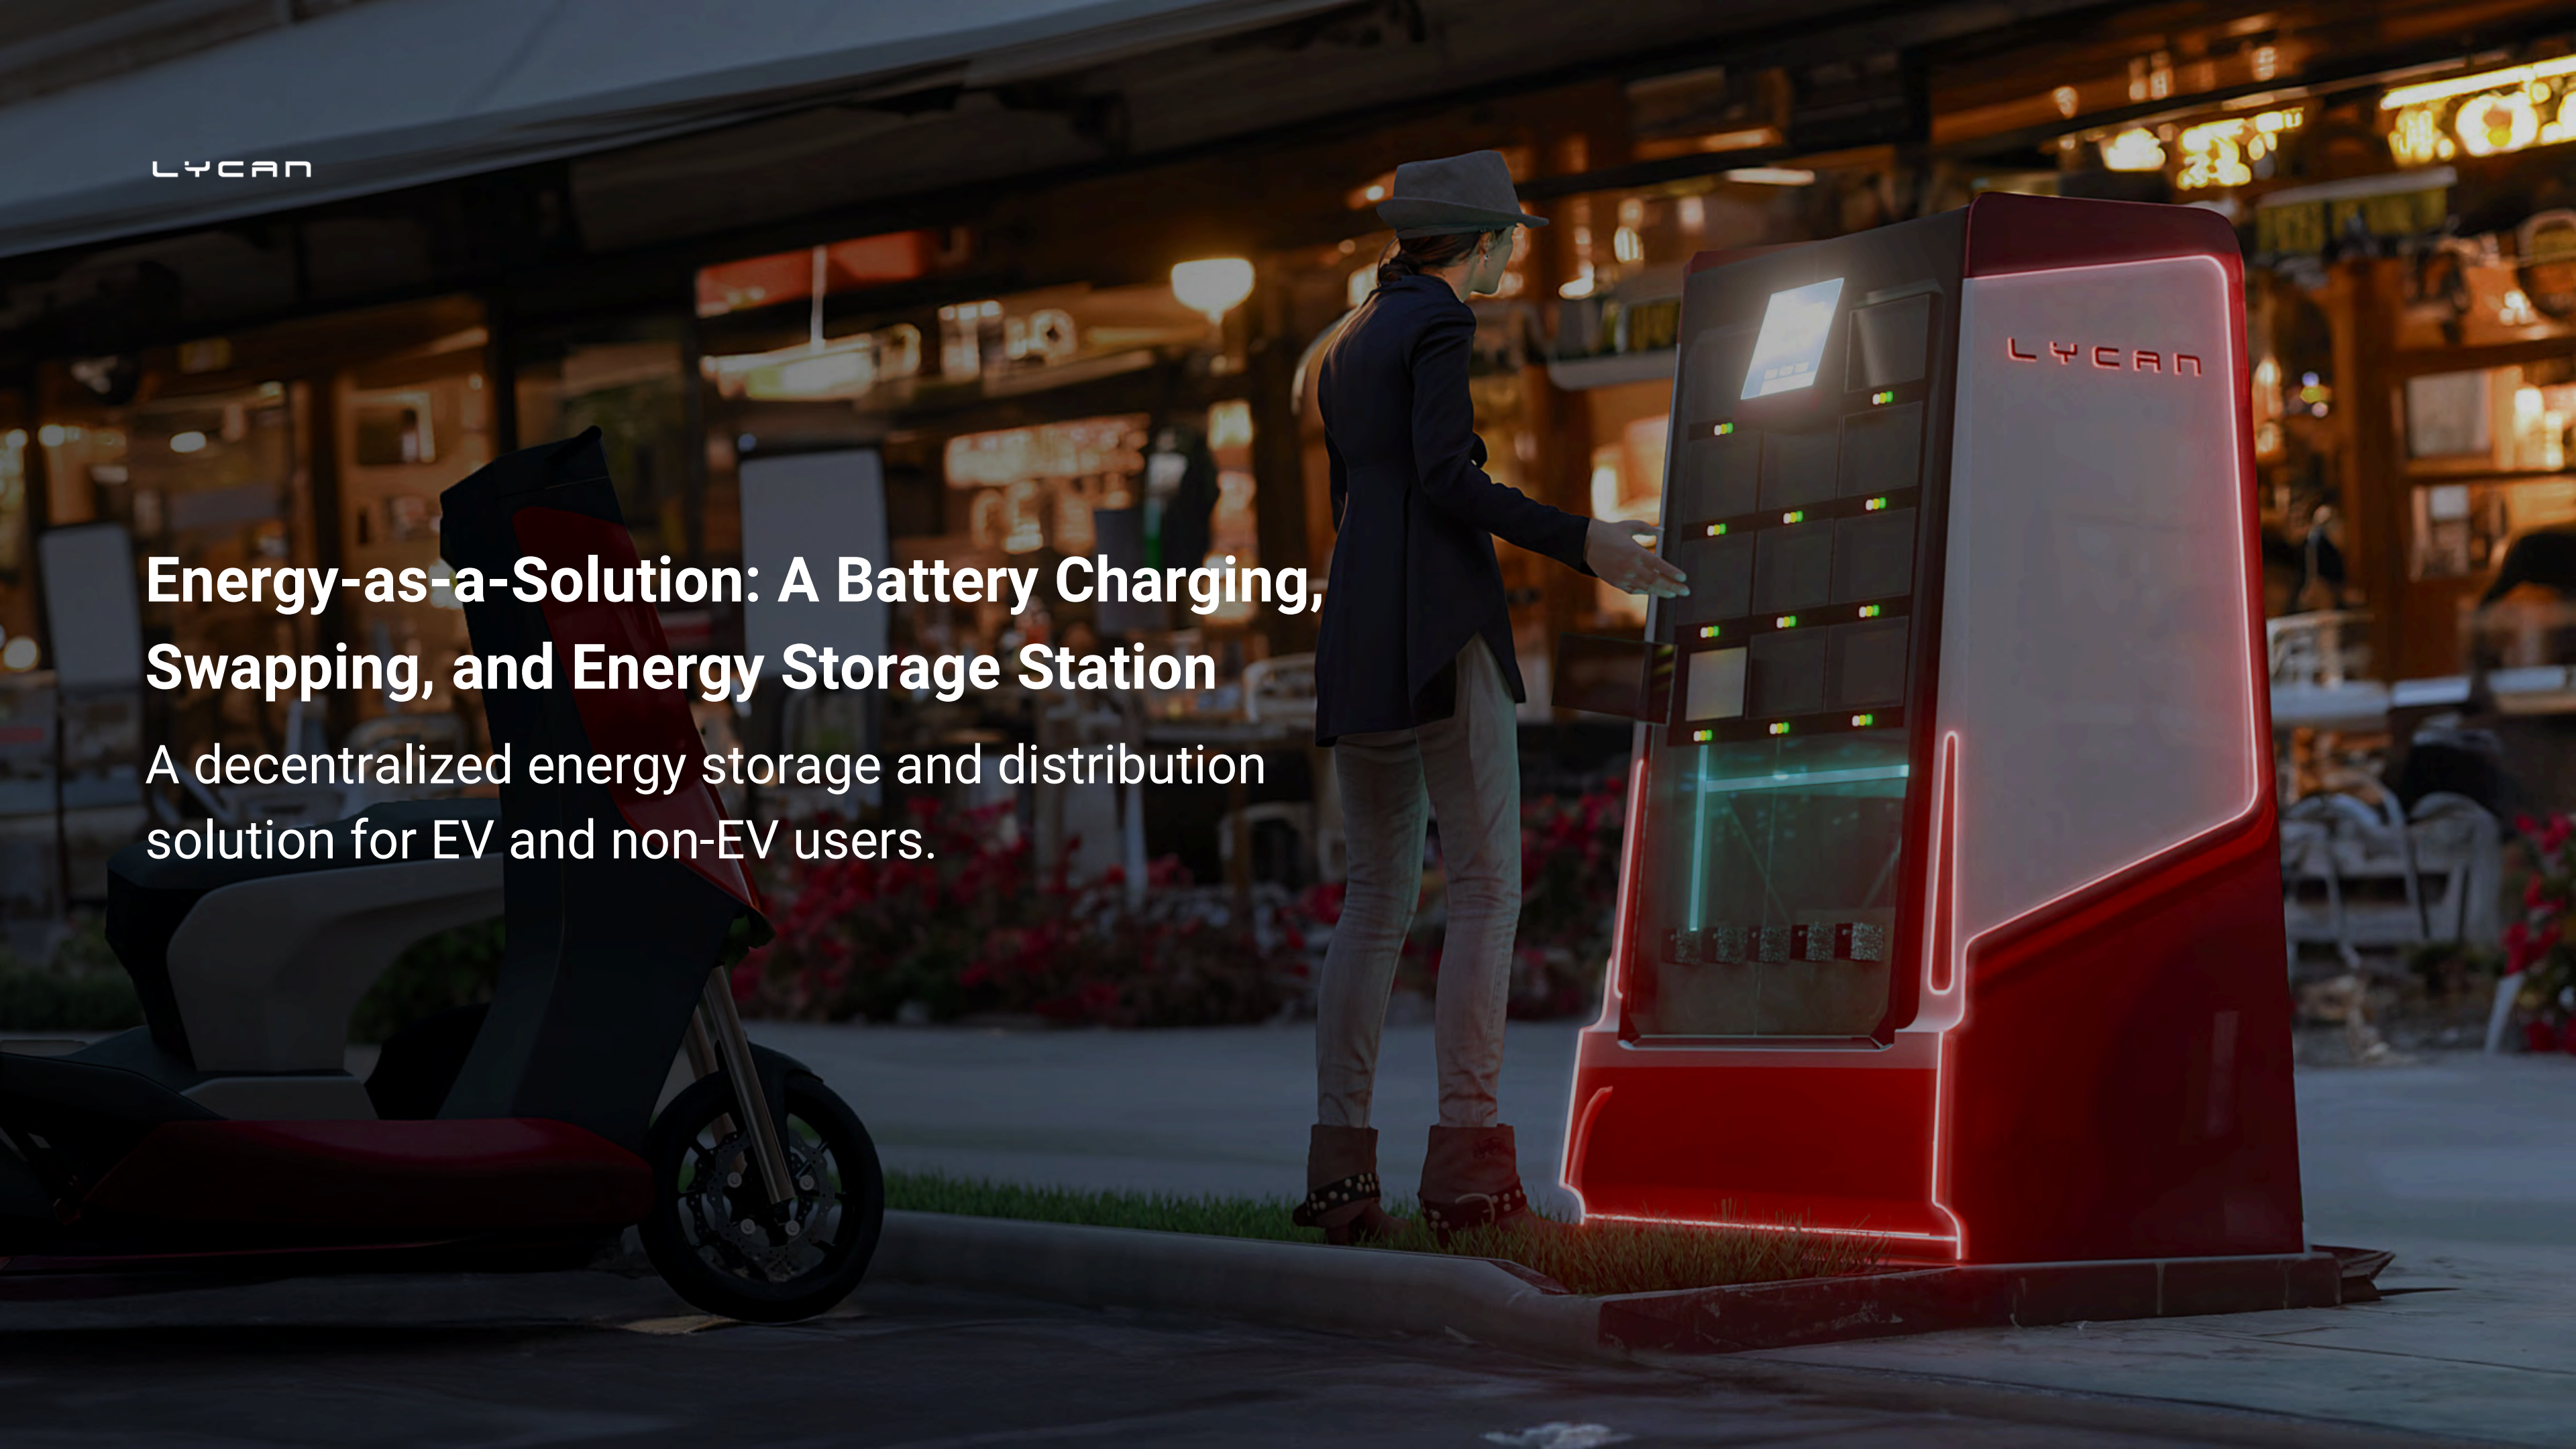

However, EV adoption is challenging because of the lack of EV infrastructures...

LYCAN

Energy-as-a-Solution: A Battery Charging, Swapping, and Energy Storage Station

A decentralized energy storage and distribution solution for EV and non-EV users.

LYCAN

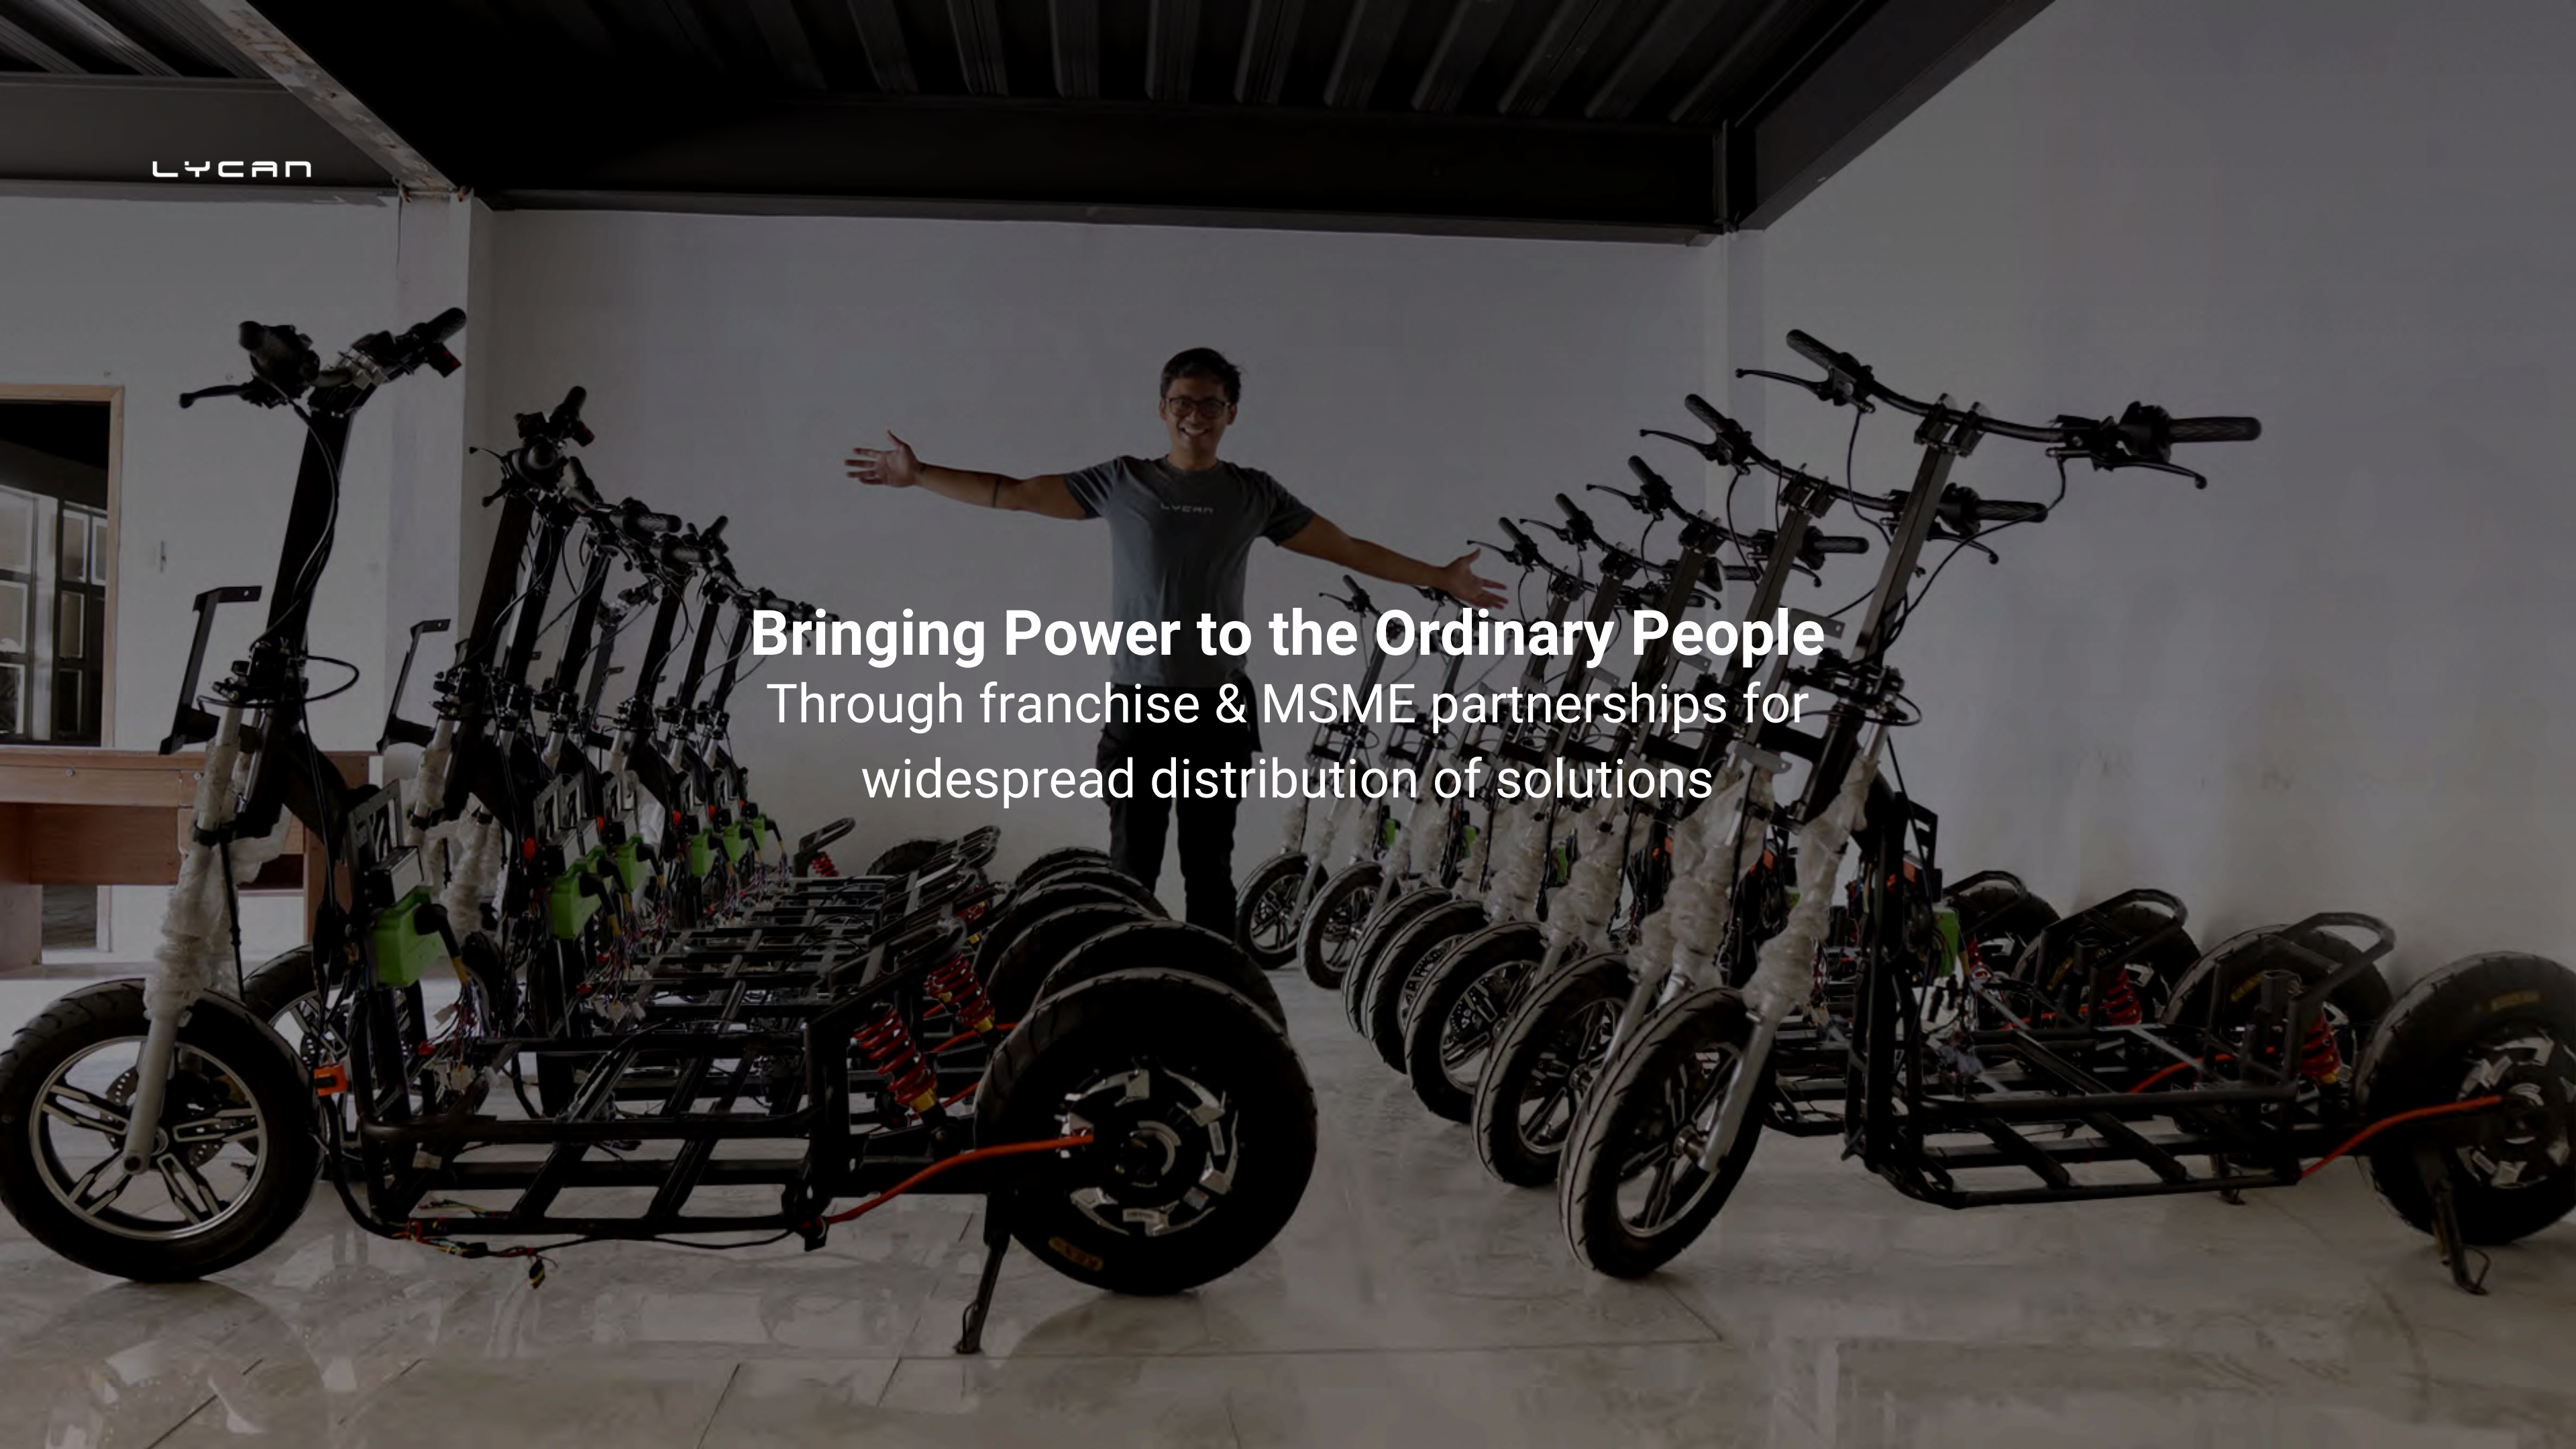

**The only way for us to truly combat
climate change is through the
widespread adoption of our solution...**

And it costs money to scale.

LYCAN

Bringing Power to the Ordinary People
Through franchise & MSME partnerships for
widespread distribution of solutions

Raising US\$1M in cash or assets for 16% equity

to build and complete the foundations and drive revenues by:

- Reaching new markets & territories
- Building and deploying EV infrastructures
- IoT network for seamless connectivity
- Building several small & repeatable production facilities
- Onboarding distributor franchisees
- Perfecting the entire system for faster deployment in new countries

LYCAN

The Founding Team and its Vision

A vision to see the development and building of the 4th and 5th industrial revolution through hardware, software, and new energy technologies that would change the lives of people for the better forever.
